

Linewize Monitor

Protecting students at home, at school, and everywhere in between

Linewize Monitor is the most advanced student threat detection tool in K-12.

As digital learning in the classroom evolves, the need to protect children online is a key safety concern for educators.

Districts must ensure they have reliable filtering in place, but also protect student safety holistically—beyond the filter.

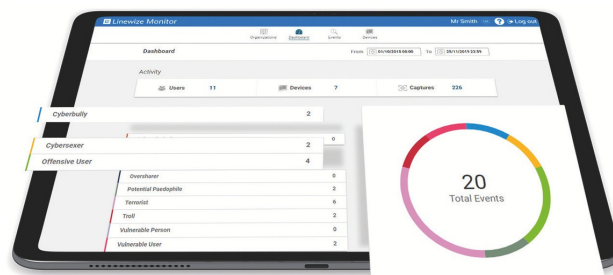

Linewize Monitor detects risks that could go unnoticed—or be noticed too late.

In 2021, Linewize Monitor found that:

- ✓ **Every 5 minutes** we spotted a child at serious risk (71% increase on the previous year).
- ✓ **Every 22 minutes** we found a child involved in a serious cyberbullying, bullying or violent incident.
- ✓ **Every 21 minutes** we found a child involved in a serious incident of offensive behavior.
- ✓ **Every day**, we found 3 serious pedophile incidents.

Linewize Monitor flags at-risk students based on what they do or say in their digital lives and alerts you when **real** threats are identified.

Linewize Monitor works 24/7 to ensure student safety.

How Linewize Monitor enables schools to better protect student safety:

- ✓ Drastically reduces false positive student safety alerts.
- ✓ Provides full window visibility (not just URLs) for better context and full-picture analysis of online behavior.
- ✓ Captures online and offline activity on any network.
- ✓ Allows schools to see what students type in social media, documents, emails, in-application chats, search engines, and more.

Linewize Monitor features

Protecting student

Teachers can focus on teaching and IT can focus on IT.

Data privacy, certified

Monitor is the only solution to hold all four iKeepSafe student data privacy certifications; COPPA, FERPA, CSPC, and ATLIS.

24/7 Real-time alerts and notifications

Our human moderators work 24/7, 365 days a year to alert you to students at risk in your district.

Detects risks across the entire digital space

The only solution to risk-assess everything student type, across Google, O365, offline documents, web chat, social media, and more.

Risk detection across seven different categories

Provides the widest categorization safety-net in K-12 including violence, bullying, suicide, drugs, abuse, extremism and oversharing.

Risk assesses the entire screen

Monitor will risk assess the full screen—not just the URL—dramatically reducing false positives and providing valuable contextual details that support intervention in a timely manner.

No IT burden

Linewize Monitor is cloud-based and deployment is fast and straightforward. There is no IT burden or ongoing technical administration.

Optimizes staff time

Provides evidence for support specialists such as Guidance Counselors and Student Safety Officers to better plan and target their time and interventions.

Works online and offline

Works offline, capturing risk events even when the device is disconnected from the internet. When the device reconnects, data is transmitted to Linewize Monitor for analysis.

No time-consuming administration

AI and human moderators work hand in hand to assess and remove false positives and only alert you when it really matters, giving you more time to focus on intervention and student support.

Designed to give you peace of mind

We'll contact you immediately by phone if we flag students at serious risk, providing a body of evidence to support our alert.

Robust reporting

You decide who receives reports, the type of reports they receive, and when they receive them. Generate easily-digestible reports to share with faculty and district leaders.

Complimentary Student Safety Audit

The proof is in the tech. When you book a demo, ask about our 30-day Student Safety Audit. We'll partner with you to analyze your district's student body for safety risks, identify any gaps we find, and present you with our discovery and solutions.

About Linewize

The Linewize ecosystem is a unique response to the challenge of today's connected learning environments. We align a series of products to help districts stay in regulatory compliance, get the most out of their purchased technology, keep kids cyber-safe at school, and impact your parent community by assisting them in raising good digital citizens.
