

Linewize EdTech Insights

Deeper data. Smarter decisions.
Greater impact.

The screenshot displays the 'Applications Usage' dashboard. At the top, there are five summary cards: 'Total Number of Apps' (310, +15%), 'Not Approved' (50, -3%), 'Flagged' (16, +1%), 'Under Review' (2, +1%), and 'Risk Rating Alerts' (2, -3%). Below these is a table with columns for App Name, License Type, Users, Avg Daily Use, Risk Rating, and Approval Status. The table lists several apps like 'Happy Numbers', 'ST Math', 'TypingClub', and 'Storyboard That' with their respective metrics and risk levels.

App Name	License Type	Users	Avg Daily Use	Risk Rating	Approval Status
Happy Numbers	Full	300	100%	Very Safe	Not approved
ST Math	Full	550	100%	Safe	Not approved
TypingClub	Full	700	100%	Unsafe	Approved
Storyboard That	Full	1,000	100%	Very Safe	Approved
Happy Numbers	Full	300	100%	Very Safe	Not approved
ST Math	Full	550	100%	Safe	Not approved
TypingClub	Full	700	100%	Unsafe	Approved
Storyboard That	Full	1,000	100%	Very Safe	Approved

About Linewize EdTech Insights

Linewize EdTech Insights gives IT leaders deeper visibility into app usage, adoption, licensing, and compliance to ensure smart, evidence-based decisions.

You can't effectively manage your tech stack without the full picture. EdTech Insights replaces basic data with the visibility and intelligence you need to optimize costs, ensure compliance, and drive instructional impact.

With all of your apps visible from one place, management and control become easier than ever.

EdTech Insights features & benefits

Ensure compliance:

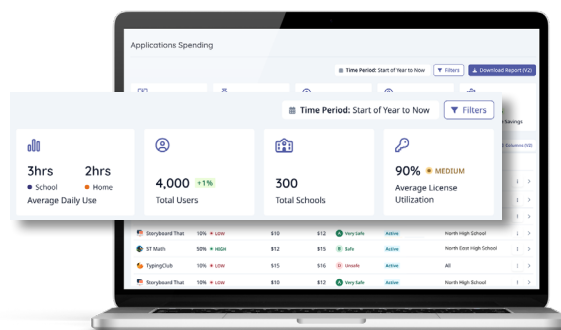

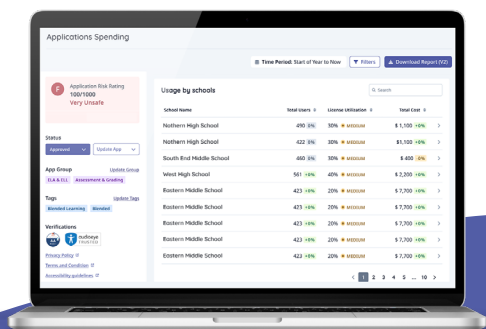

- ✓ **Expose hidden privacy and compliance risks**
See your entire app inventory and each app's approval status. Set thresholds to automatically flag unapproved apps with high usage to your IT team for review.
- ✓ **See trusted security vetting for apps**
Third-party badges indicate which apps are considered safe and which are not.
- ✓ **Get alerted when security risks change**
Third-party verification informs you in real time when an app's safety status has changed, so you can take action as needed.
- ✓ **Ensure proper data privacy governance**
Track and manage DPAs all in one place, to keep your software safe and secure.

EdTech Insights features & benefits

Optimize costs:

- ✓ **Reduce spend without negative impact**
Instantly identify unused, expired, or low usage app licenses. Filter by district, school, or app category to determine where to make cuts with the least negative impact.
- ✓ **Measure ROI across app categories**
Create groups of similar apps to compare how related apps are performing, and make informed decisions about where to cut or invest.
- ✓ **Eliminate unexpected vendor invoices**
Assess license usage and requirements before renewal time to avoid unplanned costs.
- ✓ **Remove the need to outsource**
Enable your in-house team to achieve deeper analysis with intuitive, real-time insights into usage, spending, and compliance. No need for costly external support or additional headcount.

Drive instructional impact:

- ✓ **Ensure adoption fidelity on critical tech**
Instantly see adoption by school, class, teacher, or student to determine who may need more training or support. Set custom alerts when adoption levels fall or rise.
- ✓ **Replicate success across schools**
See which schools are achieving the greatest success, and with which apps, so you can replicate across your district and improve learning equity.
- ✓ **Maintain learning standards**
Quickly see when out-of-school app usage is low or on the decline. Drill down by school, class, teacher, or student to ensure tech is working properly, and everyone has the support and training they need.
