

EdTech Audit

Linewize is now offering a no-cost EdTech Audit for US schools.

What is an EdTech Audit?

An EdTech Audit (ETA) enables you to deploy Linewize EdTech Insights in your district for 2 weeks at no cost.

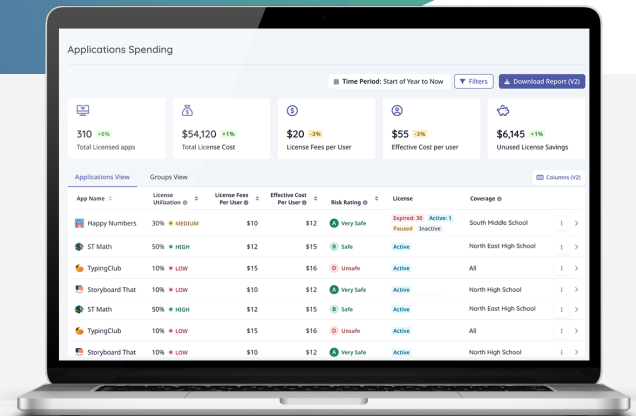

Over this period, EdTech Insights will track your district's app usage, assess security risk ratings, and calculate license costs and potential savings.

At the end of your 2-week trial, our team compiles a report with key metrics giving you insights in three fundamental areas:

- ✓ Return on Investment
- ✓ Return on Learning
- ✓ Compliance

Your district can use these insights to help:

- ✓ **Inform** your district's technology strategy
- ✓ **Guide** data-driven decisions about EdTech budget
- ✓ **Review** app approvals and security
- ✓ **Measure** and connect student learning outcomes with tech investments

How it works

1. **We schedule a deployment call with you and our Linewize team.** Our Linewize team can have EdTech Insights up and running right away with limited technical setup required.
2. **EdTech Insights runs for 2 weeks,** tracking and cataloging app usage, costs, and security ratings for your district's apps.
3. **Your EdTech Audit report is delivered to your district.** Our team reviews your app data and key findings with your district stakeholders.
