# Harness the Power of Hybrid Filtering:

Don't settle for only cloud or on-premise—have both.

To date, nearly 25% of schools in the United States rely on Linewize filtering to protect students and maintain compliance at school, at home and everywhere in between.

## Linewize Partnerships

**15,500 +**  
schools

**8.9 million +**  
students

### Cloud filtering in modern education

The majority of K-12 districts have migrated to cloud-based filtering. However, many IT leaders acknowledge the cloud-filter feature gaps and recognize the benefits of on-premises solutions.

At Linewize, you get the best of both cloud and on-prem—without compromising.

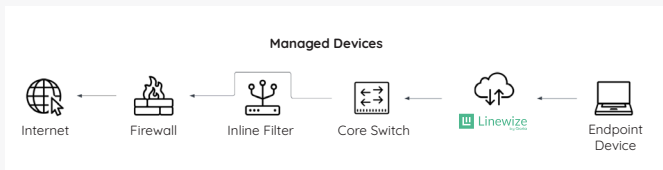

“There has been a night and day difference from our old filter to Linewize. Before, students were getting access to sites that should have been blocked and I had no visibility. Now, I can see at a glance, which sites are being blocked and what students are searching.”

**Jon Myers** | Clinton Prairie School Corporation

# What makes Linewize different?

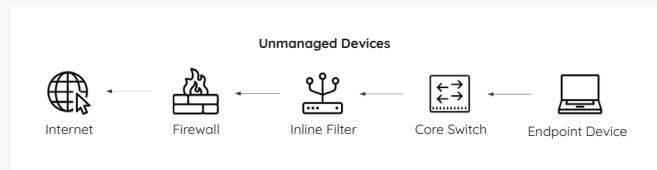

## Say goodbye to certificates and proxies

Linewize's filtering clients can view and control full path URLs, not just DNS traffic, directly at the browser lever, eliminating the need to proxy or tunnel traffic to a third-party server.

## Get your inline appliance back

With no need to proxy traffic on managed devices, our inline appliance only makes decisions for unmanaged devices. This leaves a very light touch on network traffic and allows our appliance to scale much more efficiently.

### Edit Policy

Name: Block YouTube Comments

Type: Remove YouTube Comments X  
Select content modification type

Group X Select Criteria

Criteria: Group

## Flexible filtering & policy creation

Easily create versatile rules for complex category types, such as gaming sites or AI tools. Filter criteria by username, security groups, time periods, OUs, internal IP, device names, network ranges and much more.

## The right reports for the right users

Tailor reports to an individual's role in your school or district. From website history reports for principals to packet-level reporting for network admins, your options are plentiful.

Date/Time	Verdict	Category	Activity	Type
2023/10/20 12:15:00	Allowed	Youtube	Math Antics - Order of Operations	Web
2023/10/20 12:15:00	Allowed	Google Search	How many elements are there	Web
2023/10/20 12:15:00	Blocked	TikTok	tiktok.com	Web

### Applications Usage

Signature	Unique User Count	Average Users Per Week	Average Daily Weekly Usage	Average Weekly Usage Hours
Khan Academy	12	8.3	2.9	53.6
Educational Resour...	12	3.7	1.8	33.3
ARCYA	12	6.0	1.4	22.5

## Identify what needs to be cut

See what applications and services are most used, highlight programs that are not being adopted and identify spend that needs to be cut.

## Start a proof of concept today

We encourage you to test Linewize Filter in your environment to see how your current filter stacks up. Reach out to us today at [inquiries@linewize.com](mailto:inquiries@linewize.com) to get started.
