

Linewize Filter

Harness the power of real-time, content-aware hybrid filtering.

Linewize Filter features & benefits

About Linewize Filter

Linewize Filter is a student safety-focused hybrid web filter that helps IT teams create an agile, low-maintenance filtering ecosystem.

Linewize Filter helps IT teams address common K-12 challenges, manage cross-departmental needs efficiently, and support student safety in and out of the classroom.

Because your filter should be the first line of defense.

Hybrid filtering:

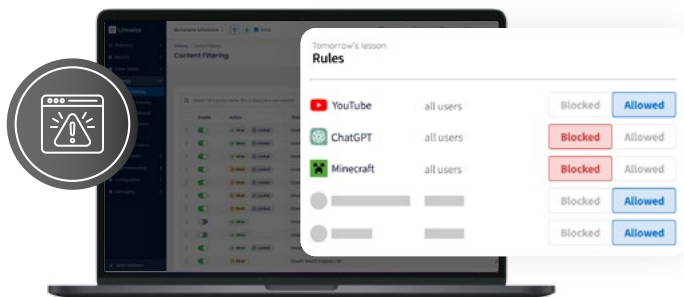

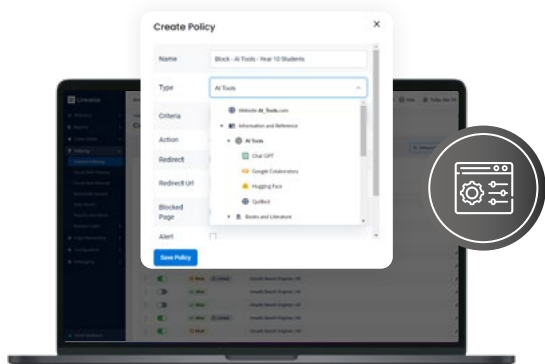

- ✓ **Choose your filter infrastructure**
Choose from hybrid hardware + cloud or full cloud deployment. Give your IT team all the benefits of cloud and inline filtering — without any of the cons.
- ✓ **Eliminate certificates and proxies**
View and control full-path URLs (not just DNS traffic) directly at the browser level.
- ✓ **Get your inline appliance back**
With no need to proxy traffic on managed devices, your Linewize inline appliance only makes decisions for unmanaged devices, leaving a light touch on network traffic.

Linewize Filter features & benefits

Comprehensive filter coverage:

- ✓ **Blur inappropriate images in real-time**
Prevent students from viewing harmful images, text, and video — on any website or search engine with the Content-aware Module.
- ✓ **Limit access to Google**
Prevent students from accessing personal Google accounts during class hours — while still allowing them access to your school's Google Workspace.
- ✓ **Troubleshoot policies**
Gauge how users or groups are impacted by policies — before and after rollout — with the “Test Policy” feature.
- ✓ **Restrict AI tools as needed**
Grant access to AI tools for specific users. Easily identify students who may be using AI tools inappropriately.

Support teachers & parents:

- ✓ **Enable teachers with flexible class permissions**
Decide which rules are locked in school-wide and which policies can be toggled on and off by designated users.
- ✓ **Equip parents with online visibility**
Give parents visibility into online activity on student-issued devices with our complimentary parental control app, Qustodio.
- ✓ **Hide distracting page elements**
Customize webpage elements to hide on-page distractions (such as comments or recommended videos on YouTube).
- ✓ **Eliminate unnecessary spend**
See how often applications and services are utilized to better inform budget decisions and resource allocation.

Granular reporting:

- ✓ **View snapshots of top reports**
Quickly view blocked apps and sites, application usage, bandwidth utilization, VPN attempts, and more in your dashboard.
- ✓ **Forensic reporting**
Report on sources of suspicious activity, check the effectiveness of filters, find users violating usage policies, and more.
- ✓ **User-based reporting**
Tailor reports to your staff, from student activity reports for principals to packet-level reports for network admins.
- ✓ **Student safety reporting**
Receive Red Flag alerts for serious student safety issues such as cyberbullying, violence, and self-harm.
